

# BR8N AI Rescue — Fictional preview

# BR8N AI Rescue — Fictional preview

Collected: 2026-10-05T17:22:39.721Z

Decision: hold

Provisional decision: hold. This decision uses your statements; no workflow was executed or independently verified.

Task owner: Unknown

Acceptor: Unknown

## ## Findings

- [user\_statement] Intended benefit: Reduce complete handling time (user-intendedBenefit)
- [user\_statement] Review and corrections exceed the old task time (user-problems)
- [inference] Zero accepted results were reported. Cost per accepted result is undefined. (user-acceptedResults)
- [inference] Reported net handling-time change: -5 minutes per task (before minus after). Include preparation, checking, correction, handover and upkeep before treating this as a saving. (user-beforeMinutes, user-afterMinutes)

## ## What already works

- None established.

## ## Priorities

- Resolve the provisional decision using one comparable small test.  
Acceptance: A permitted acceptor can explain what passed, failed and remains unknown.  
Owner: Unknown; deadline: Not set; evidence: user-workflow

## ## Next tests

- Trace one ordinary and one difficult permitted example through the complete task.  
Acceptance: Write the expected answer first. Record source/date, permissions, actual output, acceptor decision, corrections and complete person-minutes. Continue only if the agreed checklist passes.  
Owner: Unknown; deadline: Not set; evidence: user-workflow

## ## Unknowns

- Why no result was accepted and whether any result meets the answer checklist.

- Task owner.
- Person permitted to accept the result.

### ## Limitations

- Fictional reviewer fixture. This is not a client case, live website audit or verified business outcome.
- No implementation, access, safety or savings outcome has been verified.
- The provisional branch is evidence for a next decision, not permission to operate an AI system.

### ## Evidence

- user-workflow [user\_statement] 2026-10-05T17:22:39.721Z  
workflow: Draft a follow-up from an approved meeting note
- user-intendedBenefit [user\_statement] 2026-10-05T17:22:39.721Z  
intendedBenefit: Reduce complete handling time
- user-problems [user\_statement] 2026-10-05T17:22:39.721Z  
problems: ["Review and corrections exceed the old task time"]
- user-acceptedResults [user\_statement] 2026-10-05T17:22:39.721Z  
acceptedResults: 0
- user-attempts [user\_statement] 2026-10-05T17:22:39.721Z  
attempts: 2
- user-beforeMinutes [user\_statement] 2026-10-05T17:22:39.721Z  
beforeMinutes: 45
- user-afterMinutes [user\_statement] 2026-10-05T17:22:39.721Z  
afterMinutes: 50
